USAGE RATE CARD

These are the usage rates in your agreement. Each price is the most you pay for that unit; the charge for a unit may be lower, never higher. These rates follow provider prices and the AI models in use, which change often, so they are subject to change at any time without an update to your agreement. A changed rate applies to usage after this card is updated, and the current card is always at this link. Revenue Commander usage is billed as used, up to these rates, under the AI Usage Billing policy. It is paid from the prepaid usage wallet in your Revenue Commander account, which reloads automatically from your card. Your plan's monthly fee doesn't include usage.

Phone and tracking numbers

Usage	How it's counted	Price (up to)
Local phone or tracking number	per number, per month	$2.30
Toll-free number	per number, per month	$4.30
Incoming call, answered in the app or by the AI receptionist	per minute	$0.025
Incoming call, forwarded to your phone	per minute	$0.04
Incoming call to a toll-free number	per minute	$0.04
Outgoing call	per minute	$0.035
Call recording	per recorded minute	$0.005
Recording storage	per stored minute, per month	$0.001
Call transcription	per transcribed minute	$0.05

Calls are counted in whole minutes, rounded up.

Text messages

Usage	How it's counted	Price (up to)
Text sent	per segment	$0.03
Text received	per segment	$0.04
Picture message sent	per segment	$0.065
Picture message received	per segment	$0.065

A long text is split into segments, and each segment counts. Texts sent and texts received are both counted. A text counts once it's sent to the carrier, even if the carrier doesn't deliver it.

Text registration

Carriers require every business that texts to register a brand and a texting campaign.

Usage	How it's counted	Price (up to)
Brand and first campaign registration, standard	one time	$48
Brand and first campaign registration, high volume	one time	$135
Texting campaign	per campaign, per month	$23
Each added campaign	one time	$32

Registration fees are charged when the registration is submitted, whatever the carriers decide.

AI

Usage	How it's counted	Price (up to)
AI receptionist	per minute on a call, plus the call minute	$0.32
AI replies to texts, chats and emails	per reply	$0.10
AI review replies	per reply posted	$0.02
AI content, text	per 1,000 words	$0.19
AI content, images	per image	$0.13

Email

Usage	How it's counted	Price (up to)
Email sent	per 1,000 emails	$1.35

Changes

We may change these rates at any time by updating this card, without an update to your agreement (Master Services Agreement Section 1.4A). A changed rate applies to usage after the update; usage already incurred is billed at the rate in effect when it happened.
